

# Deepfake Image Report

Label: fake

Confidence: 0.997590979328379

## Signals:

brightness: 145.7338958446743

sharpness: 809.1630515218229

noise: 63.43392168247

confidence\_level: high

flags: ['strong\_fake\_pattern']

## Explanation:

**Deepfake Detection Results Explanation**

**Summary:** The deepfake detection model has predicted the input image to be fake with a high level of confidence (0.997590979328379). This suggests that the image is likely a manipulated or generated fake, rather than a genuine photograph.

**Key Evidence:**

- Signals:** The analysis has identified several key signals that indicate the image is fake: + Brightness: 145.7338958446743 (slightly above average) + Sharpness: 809.1630515218229 (significantly higher than average) + Noise: 63.43392168247 (slightly above average) + Confidence Level: High + Flags: Strong fake pattern detected
- Heatmap Analysis:** The heatmap analysis has identified two regions of interest: + Center region: 141.4821694302721 (high score) + Bottom region: 104.0347222222223 (high score) The focus is on these two regions, indicating potential manipulation or generation.
- Quality Assessment:** The image quality assessment reveals the following:
  - Lighting:** The brightness level is slightly above average, which may indicate the use of artificial lighting or manipulation.
  - Blur:** The sharpness level is significantly higher than average, which may suggest the use of image sharpening techniques or manipulation.
  - Noise:** The noise level is slightly above average, which may indicate the presence of artifacts or manipulation.
- Confidence Justification:** The high confidence level (0.997590979328379) is justified by the presence of strong fake pattern flags and high scores in the heatmap analysis. These indicators suggest that the image is likely a manipulated or generated fake.
- Final Conclusion:** Based on the analysis, the deepfake detection model has predicted the input image to be fake with a high level of confidence. The key evidence, including strong fake pattern flags and high scores in the heatmap analysis, supports this conclusion. The
